Public Information Session
Edgewood Rd – Civic Addressing

Wednesday 5th February 2025
Amherstview Firehall

Attendees

Loyalist Township

Jenna Campbell – Director of Corporate Services, Strategy & Innovation
Kent Readman – Director of Emergency Services & Fire Chief
Mike Greenham – Deputy Fire Chief
Trevor Cornelius - Marketing & Customer Service Coordinator
Andrew Hooper – Manager of IT Services/GIS
Peter Vass – GIS Technician
Megan Whalen – GIS Technician

County of Lennox & Addington

Kevin Cruz – GIS Supervisor, Infrastructure Services
Anthony Francioni – GIS Analyst

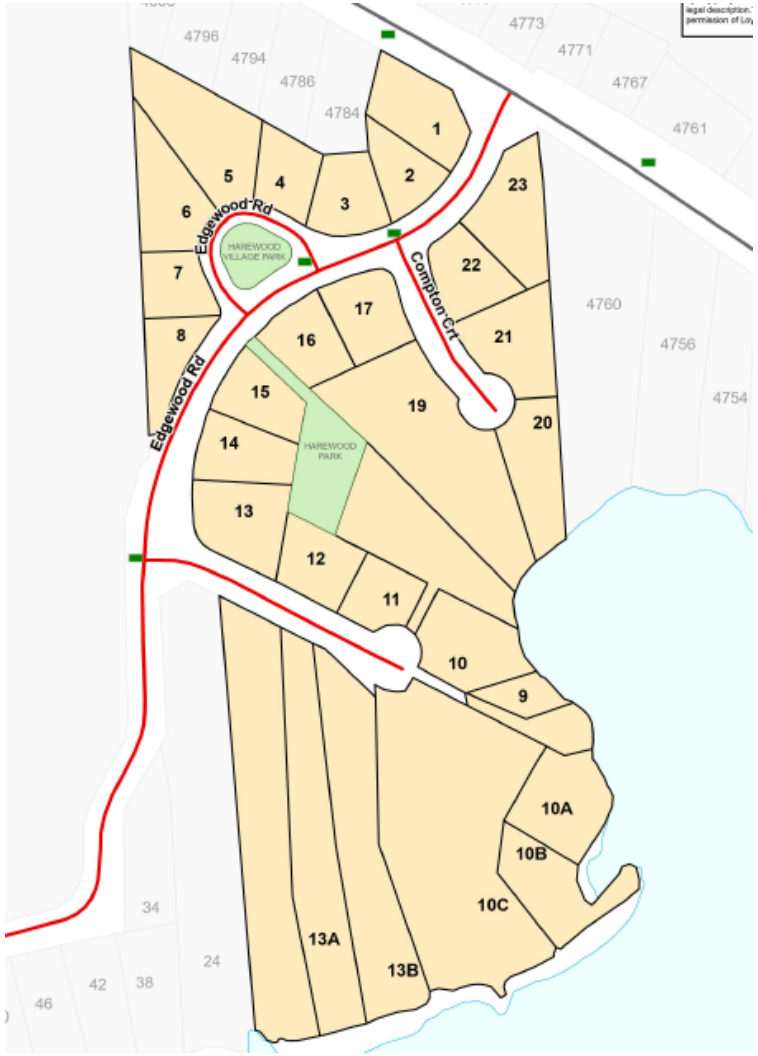

Housekeeping

1. Washrooms
2. Emergency Exits
3. Session length

Current Addressing Situation

- Does not follow proper addressing practices as outlined in the Township's Civic Addressing By-law
- Three separate road segments using the same road name
- Parks and beaches not addressed
- Addressing on Google Maps does not show correctly for some addresses

Current Addressing

Impacts of current addressing

- Risk of increased response times for emergency services
- Issues with delivery companies and service companies finding addresses
- Potential for issues with NG-911

What is NG-911

NG911 is dependent on a data model

- Current data has to fit into a standard model to work
- Need to fix certain data instances where there is a mismatch

Requires the following data layers

- Point Datasets – Civic Addresses
- Line Network Datasets – Road Centerlines
- Polygon based Datasets – Service Area Boundaries

Why is current addressing problematic for NG-911

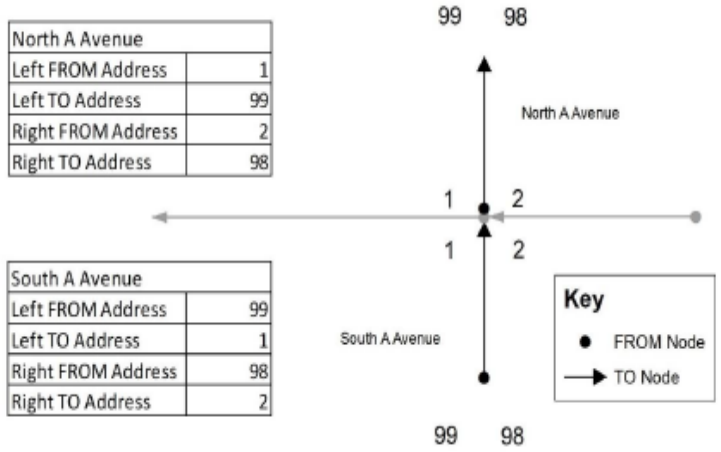

- Incorrect dispatching
- Local knowledge vs data
- Duplicate road names
- Future instances

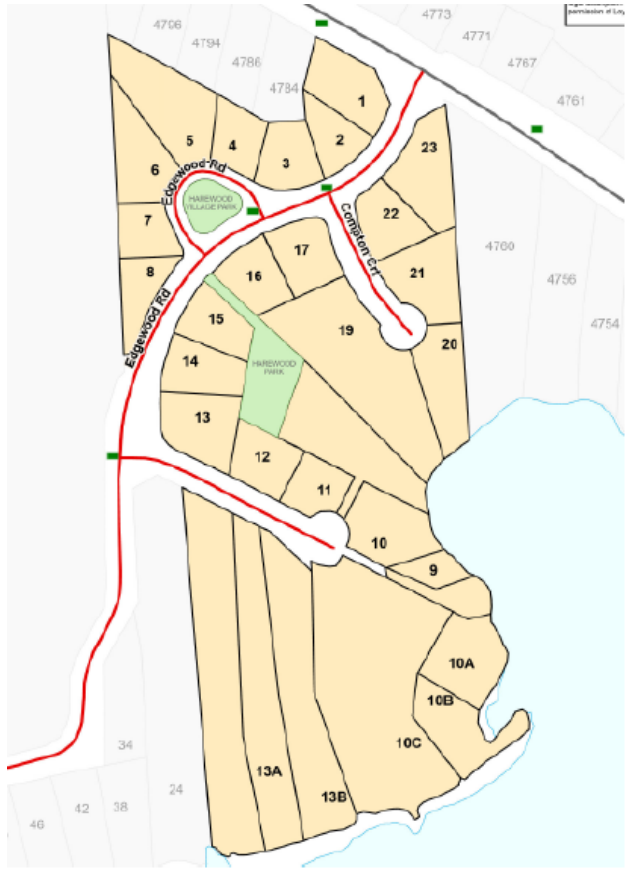

NG-911 Issues with current addressing

On Edgewood road
- No clear left and right (i.e. odd and even)
- Address range should increase (FROM – TO)

Two roads with the same name
- Segment around Harewood Village Park

Sub-addresses
- 4 addresses with the number 10 (10, 10A, 10B,10C)
- 3 addresses with the number 13 (13, 13A, 13B)

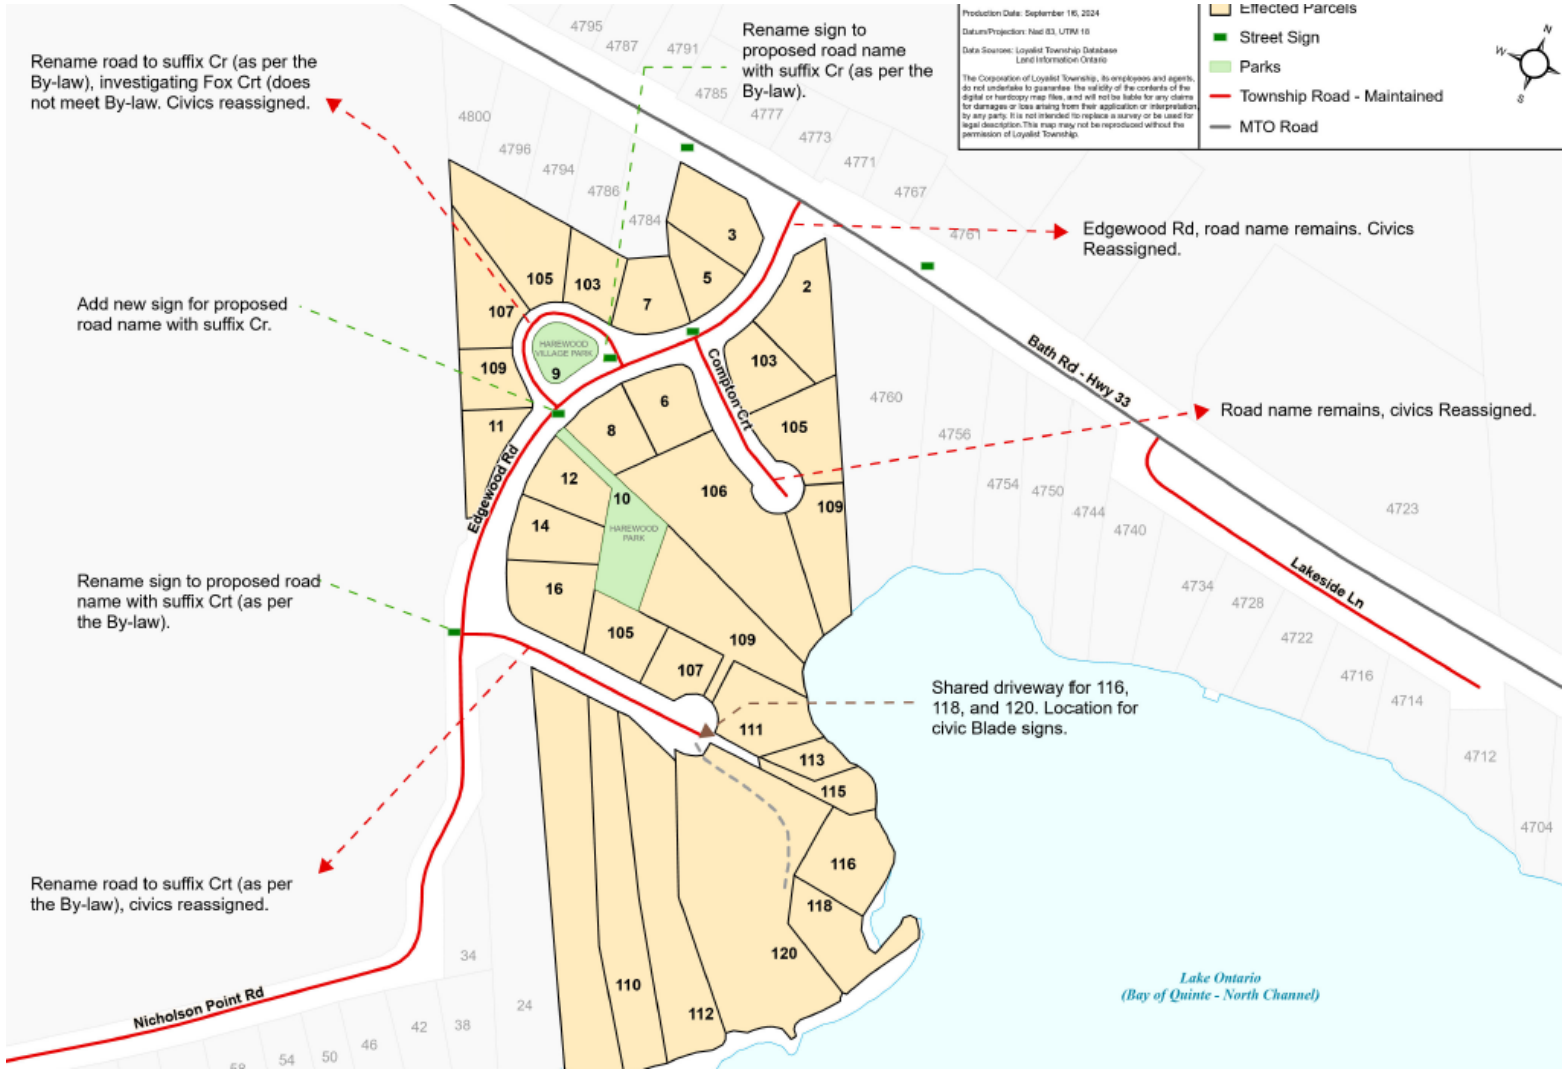

Proposed solution

1. Creation of two new road segment names for the court and the crescent road segments that currently use Edgewood Rd.
2. Assignment of civic addresses for the public parks and private beaches in the neighborhood.
3. Implementation of proper civic addressing best practices.
    - Odd/even numbers on opposite side of road.
    - Two new road names.
    - New civic blades for those impacted.
    - Updated addresses to all services to correct any issues.

Proposed Changes

Next Steps

1. Gather all feedback from various tools such as online form, emails, and notes from this session.
2. Present information back to Council seeking decision
3. Once a decision is made by Council, staff to notify residents.
    - If changes are required, detailed timelines and process will be communicated.
4. Register for the https://engage.loyalist.ca site and follow the project for notifications of what is happening.
