On October 22, 2024, staff brought forward a [draft framework](#) to the Committee of the Whole based on the direction provided by Council. In addition to the motion outlined below, the Committee of the Whole provided comments regarding park permit allocation, supporting established vendors, reviewing past public health records, recognizing commercial businesses who operate food trucks and private event organizers who host food trucks on private property, and creating opportunities for diversity. The Committee of the Whole passed the following motion:

Resolution COW 2024-23

1. That the report from the Clerk's Division, dated October 22, 2024 re: Review of the Refreshment Vehicle By-law, be received;

5. That staff be directed to return to Council with the draft by-law reflecting the results of the public and stakeholder consultation.

Motion Carried.

Considering the feedback provided at the October 22, 2024 Committee of the Whole meeting and public and stakeholder consultation, and the review of the various methods to allocate park permits, the draft refreshment vehicle by-law (Attachment 1) aims to address the following aspects of the refreshment vehicle licencing framework: Allocating Park Permits, Increasing Opportunities for Refreshment Vehicles, Distance Proximity Limitations, and Health and Safety. The remainder of the report provides insight into the development of the proposed framework.

Allocating Park Permits

As per the direction provided on October 22, 2024, staff investigated and gave further consideration to how park permits could be allocated.

At this time, applicants submit their application for a park permit and indicate their preferred park location. Currently, only one operator is permitted at each park. If multiple applicants have indicated their preference for the same park location, the permits are awarded based on a high score criteria that qualifies local food options, healthy food options, sustainable business practices and/or environmental contributions,

accessibility consideration and local to KFL&A region. Historically, each applicant has been successful in receiving a park permit for their preferred location. However, for the 2024 year, staff were faced with multiple applicants with the same preferred park location and the challenges of using the existing scoring criteria.

Allocating permits for operating in a public park with limited space can be challenging, and staff investigated several effective strategies successfully employed by other Canadian municipalities (detailed summary provided in Attachment 3). Staff identified five options:

Options	Description	Notes
Option 1 - Lottery system	Staff would draw names of applicants from a box, and the applicant whose name was pulled would receive the park permit for their preferred location. This was initially recommended in the draft framework .	• Two operators have indicated their preference for this method. • There was an overwhelmingly high negative response to the lottery system from the survey. • Method does not acknowledge operator's historical contribution to the community and does not create an incentive for operators to remain in the Township.
Option 2 - First-come first served system	Applicants are granted a park permit but not assigned a location. Each day, the operators can set up their refreshment vehicles at any of the designated locations. There would be limitations on the number of each refreshment vehicles at each location. Operators would be required to leave the Park by a certain time each day.	• Similar to the lottery system, the first-come, first served systems does not provide security for operators and does not guarantee patrons their favourite refreshment vehicle would be in the same location. • Enforcement of this system would be difficult as operators would be required

		to leave the park location each night and set up the next day.
Option 3 - Rotational system	Multiple operators would be able to use the same space but on different days of the week or times of the day.	• Difficult to implement for staff. • Does not eliminate the challenges of granting preferred times/days faced with currently.
Option 4 - Auction-type system	Permits are auctioned to the highest bidder.	• Method which can generate the highest revenue for the Township. • This method does not provide opportunity for new businesses to enter the market.
Option 5 - Merit-based system	Permits are awarded based on specific criteria such as the applicant's experience, the quality of their proposal, or their contribution to the community.	• Overwhelming response indicated preference for this method. • This is the current method utilized by the Township and would require revisions.

Based on the public and stakeholder input received and the comments made at the October 22, 2024 Committee of the Whole meeting, staff reconsidered a park permit allocation system that gives weight to the applicant's experience, the quality of their proposal, food diversity, and their contribution to the community. Staff also heard clearly from the survey respondents that a lottery system is not what they want. Of the five methods reviewed, only one method achieves these principles successfully: the merit-based system.

Given the current process utilizes a merit-based system, staff reviewed the existing criteria and are proposing a revised merit-based allocation system that has clearly defined and tangible criteria, focuses on local economy, local interests and customer satisfaction, promotes diversity in food options, and promotes adaptable business practices. The revised scoring system ensures a holistic evaluation of a park permit application, provides clear and straightforward rubric making it easy for staff to compare different applications, and places the onus on the applicants to submit a high-quality

application. The proposed scoring system can be found in Attachment 4 of this report and is included in the draft by-law Council would approve.

If Council approves this method, staff would create a detailed application form asking for relevant information. Staff would receive applications until December 31 each year. Once the deadline passes, staff would review and score the applications. If one or more applicants indicated their preference for one park location, staff would use the scores to grant the permit for that location, awarding the permit to the highest-scoring applicant. The applicants with lesser scores would be provided other available options either in the same park at a different location, in a different park, or asked to find a location on private property.

Increasing opportunities for Refreshment Vehicles through increased Park Permits

When asked if in favour of creating more opportunities for refreshment vehicles to operate in the Township, 69% of the survey respondents answered 'yes'. Staff considered this clear request and identified the following ways to achieve this initiatives:

- Simplifying the application and renewal processes for refreshment vehicle licenses can encourage more operators to set up their refreshment vehicles. This includes reducing paperwork, offering online applications, and providing clear roadmap. This work is currently being conducted through the review of the by-law.
- The Township can also support refreshment vehicle operators by listing their contact information on the Township's website to promote them for local and community events. This would also encourage partnerships between refreshment vehicle operators and community groups for special events. Highlighting that they are licenced by the Township can attract more customers and boost their success.

Another way the Township can increase opportunities for Refreshment Vehicles is by expanding the number of park permits available. Allowing refreshment vehicles to operate in more areas can increase their visibility and accessibility.

At this time, the Township has three parks available to lease to refreshment vehicle operators. Only one refreshment vehicle is permitted for each park.

1. Fairfield Park-4574 Bath Road Amherstview
2. Finkle Shores Park- 697 Bath Road, Bath
3. Bath Centennial Park-336 Main Street, Bath

In addition to the first three listed above, staff have also identified Babcock Mills as a suitable location for operating refreshment vehicles. Staff would also work throughout the year to identify any other suitable parks. Staff have also proposed to remove the 'one refreshment vehicle per park' limit to increase the number of permits which can be assigned to each park. This will allows residents to have access to multiple refreshment vehicles from one area.

Staff are also recommending that the Director of Community & Customer Service be provided the authority to add or remove locations for Park Permits from time to time, and if suitable permit multiple operators at one park. This way, if another suitable Township property is identified, the Clerk would be permitted to issue a licence to operate there as long as it was to the satisfaction of the Director of Community & Customer Service.

With the increased number of park permits, simplified road map, and helping promote licenced operations, the Township can achieve the request from the public to create more opportunities for refreshment vehicles on Township property.

Proximity limitations to existing businesses

Through the October 22, 2024 staff report, staff proposed a 120-metre proximity restrictions to existing eating establishments. Exemption from this provision would be available where the refreshment vehicle is located on Township property where the operator has a valid Park Permit.

When asked their thoughts on the proposed 120-metre proximity limitation from existing eating establishments, only 12% indicated that the restriction is not adequate. The rest (88%) indicated that the restriction is either adequate or too restrictive.

Given the response, staff are continuing to recommend the 120-metre distance limit although the condition that they be selling 'similar products' will be removed as that is too subjective. This limit would be measured from the closest boundary lot line of the refreshment vehicle straight to the nearest lot of the existing eating establishment. Staff would also like to clarify that multiple refreshment vehicles would be permitted on private property as long as it was permitted under the Zoning By-law and the refreshment vehicles are licenced under this by-law.

Health & Safety

Finally, staff would like to address the comments and questions citing concerns about hygiene and cleanliness received from the Committee of the Whole and the survey.

Refreshment Vehicles such as food trucks, catering vehicles, chip trucks, ice-cream trucks, or food carts are subject to Ontario Reg. 493/17 (Food Premises) under the *Health Protection and Promotion Act*. This regulation sets the minimum food safety requirements, from equipment and maintenance to safe food storage and preparation.

Prior to operating, the applicant must notify the Health Unit. A Public Health Inspector will conduct a pre-opening inspection at least one week before any planned use. The mobile premise must be in a 'ready to operate' state for the pre-opening inspection. During the pre-opening inspection, Public Health would see that all equipment is functioning properly, this includes electrical accessories, hot water tanks, running water,

operating fridges, hot-holding units, adequate lighting, etc. If approval is received, the refreshment vehicle may operate.

In addition to the inspections conducted by Public Health, Township staff look to ensure the refreshment vehicle has passed health inspections, has passed Technical Standards and Safety Authority (TSSA) inspection and has passed inspection of the hood/fire suppression system by a qualified technician.

If complaints are received, by-law enforcement would conduct a site visit for inspections. Complaints about food safety or food hygiene concerns would be directed to the Health Unit. If the concerns cannot be rectified, the operation would be shut down until all required inspections are completed and certificates are obtained.

Financial Implications

Staff are recommending that the fees associated with the licence be removed from the licencing by-law and incorporated into the Fees and Charges By-law. There is minimal financial impact associated with the proposed fees and fines however, moving the fees to the Fees and Charges By-law would mean the fees would be regularly reviewed.

The impact would increase the amount of revenue that the municipality could potentially receive if the same number of licences are issued.

If the by-law is approved as drafted, there would be minimal impact to operations. Any impact to operations would be recovered by licence and park permit fees.

Risks or Stakeholder Implications

There are multiple risks associated with the recommendations in this report:

- Stakeholder Risk - Refreshment Vehicle operators may be content with the licensing process as is. Staff are recommending this process because it is a more clear and transparent roadmap to licensing. The draft by-law was developed in consultation with staff, Council members, and members of the public. If approved, the new framework and assistance from the Clerk's Division would be available.
- Stakeholder Risk - Removing the limitations on the number of park permits can increase competition between refreshment vehicle operators and may crowd the public parks.
- Legal Risk - Given the small number of licenced operators in the community, the changes to the existing by-law may unintentionally affect one or more operators. For that reason, the by-law has been reviewed holistically.
- Operational Risk - Merit-based scoring system is open to some interpretation and may cause dispute. Staff have attempted to create a rubric that uses tangible qualifiers to minimize this risk.

Communication and Consultation Plan

Staff gathered input from the general public and industry specific stakeholders through a survey which ran between October 25 and November 18, 2024. The response from the public was fantastic with 289 responses received. The following sample of results from the survey indicate overall comments from the community. A copy of all the responses received can be found on the Loyalist Engagement Platform and attached hereto as Attachment 5.

1. Are you aware of the [current Refreshment Vehicle By-law](#)?

- Of the 289 respondents, half of the respondents indicated they were familiar with the by-law and half who indicated they were not.

2. Staff are [proposing changes](#) to the current By-law. How familiar are you with the proposed changes to the Refreshment Vehicle By-law?

- Of the 289 respondents, 40% indicated they were familiar and 60% indicated they were not familiar.
- To address this feedback and to help the members of the public and operators understand the new framework if approved by Council, staff will develop communication items and a road map with the goal of gathering input, informing and educating, understanding the needs of the operators, and exercising ongoing communication and relationship building.

3. Have you ever supported a refreshment vehicle in the Township in any way ex. purchasing food/drinks? If yes, how?

- Of the 289 respondents, 97% indicated they have supported refreshment vehicles in some way and only 3% indicated they had not. A majority of the responses shared that they purchase food/drinks from the refreshment vehicles and some sharing that they hired a food truck for their special events.

4. Are you in favour of creating more opportunities for refreshment vehicles to operate in the Township? If yes, explain how.

- When asked if in favour of creating more opportunities for refreshment vehicles to operate in the Township, 69% of the survey respondents answered 'Yes'. Many of the respondents shared that the Township should create more space for refreshment vehicles to operate, increase the number of refreshment vehicles in one place, and encourage more variety in types of food. Respondents also shared that the licencing process should be simple, equitable, and the Township should not place anti-competition provisions.
- To address this feedback, staff are proposing to increase the number of park locations and removing the limit on the number of refreshment vehicles in one park. Staff have also added 'menu diversity and innovation' as a criteria within the clarified scoring matrix.

5. What are your general thoughts on the proposed changes to the Refreshment Vehicle By-law?

- Respondents overwhelmingly shared that they were not in favour of the lottery based allocation method as it would disadvantage the existing operators who

have established regular customers. Many also cited that they regularly frequent their favorite refreshment vehicles at the park. Others shared that refreshment vehicles should not be a permanent fixture and must be built to travel. Some indicated there is not a need for more refreshment vehicles, and there is a need to protect existing businesses. There were some respondents who were unfamiliar with the proposed changes.

- To address this feedback, staff are not proposing the lottery-based system. Staff are proposing a scoring system that gives weight to longevity in the community an community engagement meaning operators have an incentive to remain in the Township and participate in community events and fairs regularly to receive a higher score.

6. What are your thoughts on the proposed 120-metre proximity limitation from existing eating establishments?

- Only 12% indicated that the restriction is not adequate. The rest (88%) indicated that the restriction is either adequate or too restrictive.
- To address this feedback, staff are continuing to propose the 120 metre proximity limitation between refreshment vehicles and existing eating establishments but removing the qualifier of "similar" food.

7. How do you think the changes will impact the relationship between refreshment vehicles and local businesses?

- Respondents shared that when appropriately distanced, businesses and refreshment vehicles can coexist, and that healthy competition is good and that it would keep costs down for patrons. Similarly, others shared that there are not enough businesses in the Township and residents tend to go into neighbouring municipalities to eat.

8. Do you think the proposed changes will adequately protect local brick-and-mortar restaurants?

- Of the respondents, 50% indicated that they didn't know. Others were evenly split between 'yes' and 'no'.

9. Do you believe the proposed changes will positively or negatively impact the community? Why?

- Respondents were split on this question. Of those who indicated there would be a positive impact cited that food trucks don't belong on the main streets, the proposed changes increase diversity, and greater control and regulation may lead to less conflict. Of those who indicated a negative impact cited that the Township should not change what works, changes to increased costs could make it difficult for new entrepreneurs, the approval process is too restrictive, the Township should not be intervening in people's livelihood, and again, a lottery system would negatively impact operators.

10. Are there any additional considerations or concerns you think should be addressed in the proposed by-law?

- Respondents cited concerns about public, hygiene, proper waste management, and enforcement of the by-law.

Staff received feedback from four current licenced operators (Attachment 6). To summarize:

- Two indicated their preference for a lottery system and two indicated that they were not in favour of the lottery system.
- Comments shared cited operators should be incentivized to stay in Loyalist Township and the Township should reward long standing operators who have made a contribution to the community through philanthropy or participating in community events.
- One suggested park permits should be award for a term of up to 5 years. Staff do not recommend this as this would not create diversity or opportunities for new businesses to enter the market.

Other feedback received included:

- Comments from the October 22, 2024 Committee of the Whole; and
- Appropriate Township staff: Emergency Services and By-law Enforcement, Recreation & Facilities and Recreation Services, Corporate Communications and Development Services

Upon approval of the by-law, staff will update the webpage and documentation and forms. Intake for the 2025 year will open on December 11, 2024. The Clerk's Division will also offer assistance to applicants during the application period to ensure applicants are aware of the changes to submit a complete and high quality application.

Alternatives

Alternative to a merit-based allocation system

Council may consider an option any one of the other four methods listed in Attachment 3. Staff did not recommend those methods because they do not give weight to operators who support the community through participation in various community events, philanthropy, or have an established customer base in the community.

Alternative to increased number of park permits

Council may consider an option where the limit of one operator per park continues. Staff did not recommend this initially because the public response was overwhelmingly in favour of creating more opportunities for refreshment vehicles to operate in the community and removing barriers. Allowing more than one refreshment vehicles in park can provide diversity in food choices for residents.

Attachment 3 – Comparison of various methods to allocate Park Permits

Options	Description	Advantages	Disadvantages	Municipal Examples
1. Lottery System	Staff would draw names of applicants from a box, and the applicant whose name was pulled would receive the park permit for their preferred location.	• Levels playing field for those starting their refreshment vehicle business. • This method is objective and clear. • Impartial and promotes diversity in the availability of food in our community. • Simple to implement and for applicants to understand.	• Consultation responses were overwhelmingly against this method. • This method is unpredictable. • Regular operators who provide significant community benefits might not get a permit.	• City of Vancouver uses a lottery system to award new permits to stationary non-food street vendors. Lottery winners are awarded new non-food street permits that are issued on May 1 every year. • Town of Collingwood uses a lottery system and only one vendor per general food category.
2. First Come, First Served	Applicants are granted a park permit but not assigned a location. Each day, the operators can set up their refreshment vehicles at a designated location. There are limitations on the number of each refreshment vehicles at each location. Operators would be required to leave the Park by a certain time each day.	• Objective and transparent. • Impartial and promotes diversity in the availability of food in our community. • Simple to implement and for applicants to understand.	• There is no guarantee for the operators. • This method is unpredictable. • Regular operators who provide significant community benefits might not succeed in securing their preferred location each day. • Difficult to enforce as operators would be required to leave the location at the end of day.	• City of Toronto (Mobile Food Vending Permits)
3. Rotational System	Multiple operators would be able to use the same space but on different days or times of the day.	• Higher fees during peak times can help manage demand and ensure space is used efficiently. • Gives multiple operators a chance to benefit. • Can generate additional revenue.	• Given the nature of the business, this may cause unfair advantages or disadvantages to certain operators if they are issued a favourable or unfavourable times/days. • Complex to implement. • Risk of impartiality due to the complexity in implementing the system. • Does not eliminate the challenges of granting	• City of Ottawa

Options	Description	Advantages	Disadvantages	Municipal Examples
			preferred days/times if two operators indicated their preference for the same timeslot.	
4. Auction System	Permits are auctioned to the highest bidder.	• This can generate revenue for park maintenance. • Favours established operators.	• Difficult for smaller operators to compete with established operators. • Does not create opportunities for first-time entrepreneurs to secure a park location. • Complex to manage. • Requires pricing to change year-to-year.	• City of Toronto where certain high-demand permits, such as those for food trucks in prime locations, can be awarded through a competitive bidding process.
5. Merit-Based System	Permits are awarded based on specific criteria that the Township deems a priority such as the applicant's experience, the quality of their proposal, or their contribution to the community.	• Ensures most qualified or beneficial operators are granted a park permit. • Shows preferences to operators who have historically held park permits within the Township. • Offers consumers with guarantee that their favourite operators will be available in the years to come. • This method would engage in the decision-making process to ensure that the allocation meets local needs and preferences. • Higher likelihood of community buy-in and satisfaction with the permit system.	• Unless definitions and criteria are clear, it may lead to subjectivity and may lead to conflicts. • Difficult to confirm whether information provided by the applicants is accurate. • Gathering and analyzing applications can be time-consuming.	• Currently in Loyalist Township • City of Kingston • Town of Greater Napanee • City of Toronto • City of Vancouver uses a scoring system to award new permits to stationary street food vendors. Top-scoring applicants are awarded new street food permits.

309	Nov 01, 2024, 02:44 PM	I think it will negatively impact the community as a hole. People love going to places like Fryway33 to get their take out. If you shut them down, it will have a ripple effect on the community as a whole.	Fryway33 (Organization)	English

302	Nov 01, 2024, 01:05 PM	Negative for those that are big supporters of the community. A new vehicle will not necessarily provide all the support that the already existing unit does. The community could lose all that already existing support .		English
301	Nov 01, 2024, 12:52 PM	The lottery systems does not explicitly protect existing food truck operators in their establish location & market. This needs to be part of any new policies & by-laws.		English

291	Nov 01, 2024, 08:08 AM	I think it would negatively impact local business if you do not protect local business such as Fryway 33 who support their community with local charities, and live music at the park. 279	Oct 31, 2024, 09:54 PM	Negative if it removes food trucks that have been main stays in the area. If they are still there after many years then they should be applauded for their success not penalized by being replaced by a name pulled out of a hat.		English

265	Oct 31, 2024, 06:34 PM	Like mentioned earlier, regular mobile food trucks will likely relocate and people will either stop going to the parks for lunch or just pack their own food. Either way it equals lost revenue.		English

235	Oct 31, 2024, 03:38 PM	Negative. Food truck vendors are going to be screwed by this. If people have learned that the truck in location a has great food, but maybe the truck at location b doesn't... it's going to mess with people when trucks get switched to new spots.		English
234	Oct 31, 2024, 03:27 PM	Negatively. They give back so much. The township and bath touristy will be losing.		English

220	Oct 31, 2024, 02:41 PM	Not sure!		English
219	Oct 31, 2024, 02:40 PM	I think they will negatively impact the community because the current food trucks have built relationships with the community and do positive work in the community. 209	Oct 31, 2024, 01:40 PM	I think changes that would be positive would be adding more options for vendors and the only negative thing would be taking existing vendors and not giving them grandfathered rights		English
208	Oct 31, 2024, 01:28 PM	Negatively. New food trucks may offer many of the same things the only two brick and mortar locations Bath has.	Bath (Location)	English
207	Oct 31, 2024, 01:00 PM	Certain mobile trucks that have been there for long enough should get priority		English
205	Oct 31, 2024, 12:06 PM	Negatively. No reason to change a good thing. Leave Fryway33 alone. They do a lot for the village of Bath, the library, the Lions club. The food bank. They also provide a platform for local artists to play music on Sundays.	Fryway33 (Organization); Bath (Location); Lions club (Organization)	English
203	Oct 31, 2024, 09:53 AM	i believe it would be negative as it would servely limit many community groups such as sout anad guide or Lions club from having any kind of fundraising bbq and thus restricticting or taking away an important fundraising mechanism having to get permit	sout anad guide (Organization); Lions club (Organization)	English

201	Oct 31, 2024, 09:37 AM	Lottery based system for permits will negatively impact the community, because longstanding establishments, who are known to give back to the community, offer great service and variety, and engage with unique events, may not be granted a permit,		English
198	Oct 31, 2024, 09:28 AM	My only concern is Fryway33 in Finkle Shore Park having to relocate if a lottery system is put in place to determine territory.	Fryway33 (Organization); Finkle Shore Park (Location)	English

191	Oct 30, 2024, 04:06 PM	They may		English
190	Oct 30, 2024, 03:51 PM	I think it would be a positive step. The bricks and mortar return money back to our community in sponsorship and community event attendance and donations. If the mobile services are not directly from this area they do not enhance or support the community		English
189	Oct 30, 2024, 02:53 PM	I am still not clear on what the proposed changes are.		English

177	Oct 30, 2024, 11:18 AM	Negatively if it impacts how food trucks can operate together at events		English
174	Oct 30, 2024, 09:29 AM	Less choice for consumers.		English
168	Oct 29, 2024, 02:13 PM	a lottery is not fair we have worked hard to establish our business here and we should be allowed to continue to operate without fear of being replaced on a whim		English

151	Oct 28, 2024, 09:45 AM	By allowing only Licensed food trucks to park at designated, permitted location it provides more than sufficient dining options without increasing liability for the township or taking away from the beauty of Bath.	Bath (Location)	English

147	Oct 26, 2024, 09:49 AM	I don't know which they will do till they've been tried, however if they turn out to be a negative impact it my be difficult to recover from		English
146	Oct 25, 2024, 07:30 PM	The proposed changes are positive. An increase in refreshment vehicles is a tourism draw for Loyalist. People often plan entire road trips around food trucks		English

Dear deputy clerk, all township employees, council members and mayor,

As Soup Chef food truck, we would like to give our opinions on the upcoming changes to the parks permits. As business owners as well as residents of loyalist township we are concerned by some of the changes you are proposing to make. As Soup Chef food truck who has been awarded the permit to operate in Fairfield Park for the last 10 years we are even more concerned.

First, we would like to say that when we started out in Fairfield park in 2014, it was a park not well used, overrun by geese, full of goose poop. Over the years a joint effort between the township and ourselves to increase people traffic & decrease the geese has resulted in a park that is more attractive to people, children and their pets. making it a destination! During COVID this park was very full every day, people used it like a full-on beach it was wonderful to see and an addition of sand in the beach area would be very inviting if that is possible as a suggestion for the future.

We are proud of what we have been able to accomplish in Fairfield Park. We are proud of what we have accomplished here in Loyalist township. We have run your Arena canteen, your baseball field, we have supported your events and this community. We Love this community & the business we have grown here, we wish to continue that far into the future.

Every season we have hired local youth, we teach them transferable skills that they can take with them in the future and will be useful to them for the rest of their lives no matter where they go from here. Cooking, Safe food prep, Customer service, Teamwork, Math, Inventory control, social media for business, Accounting, Workplace safety, Safe operation of commercial equipment, and the list goes on. We are proud to say that over the years we have hired & trained over 12 youths from Loyalist most of whom worked for us from the age of 15 until they went off to university!

When we started 2014 I believe the park rent was 850.00 for the season which included garbage removal and washroom facilities which are needed to comply with KFL&A Public Health requirements, we paid separately for hydro and we were able to secure our spot for 3 years at a time provided we follow the bylaw rules. We did this for 2 contracts. In 2019 the park fees were raised to 1350.00 still included garbage removal but now included hydro as well however we were now only able to re-apply yearly. In 2020 during covid our park feed doubled to 2750.00 per season and we still need to apply each year, now I understand the need for price increases but as you well know restaurants of all kinds are failing right now at incredible rates due to the high costs of supplies and shipping, the increase in wages, the lack of workers, the inability for people to afford the basic needs so they cannot afford to eat out! We should be trying to help keep our small businesses in business. Our sales, just like everyone else's have been down since

COVID. We have purchased a second truck to use for events etc. to try to make up for the decrease in sales revenue. We would like to point out that the township seems to be comparing our park permit awarding and pricing to Kingston's but we are no where near the size or population of Kingston (132,000), we are on point with the population of Napanee (16,000) and the fee to be in the park there is \$800 with electricity an additional 150 for license total \$950.00 Population of loyalist township is (17,000)

- maybe consider the proximity to other similar restaurants but that should be on an individual basis.

- awarding by lottery ? maybe consider 1 to 5 years awarded yearly, I feel like this idea of awarding spots by some form of lottery would punish the businesses who have been doing a good job serving this township for years.

continuing to award permits to businesses who have already been operating here without incident and who have continued to work with the township & the community to make the parks more appealing to everyone.

- consider a longer contract 3-5 years for established businesses in the parks/township as it is very worrying already to apply every year and not know if you are going to be able to continue to operate another year

We believe we have always had a good relationship with the township and their employees, We have assisted in the maintenance of the park wildlife EI taking injured animals to sandy pines

This community has become a part of our family, we have watched children of our customer's grow up, we have hired them,

We do the best job we can each year in the park and then pray we are given the opportunity to do it again next year.

I hope the township recognizes our efforts and continues to allow us to operate in the park without worry of being replaced.

Sincerely,

Soup Chef

Dear Akantha,

I was hoping you would have called me in response to the email request I sent this morning.

Since you have not had the opportunity, would you please send me a copy of the survey regarding the food trucks and the possible lottery for locations, etc. I think the lottery would be most beneficial, but I also have some suggestions and opinions I would like the committee to consider.

I only heard of the survey late yesterday evening, and apparently it closes today, which is why I requested the phone call.

If that is not possible, please let me know, and send me a copy of the survey and I will try to fill it out on my phone.

"Discussion topics for Loyalist Township Clerk meeting:

Fees (fine with it, could even go higher), garbage collection fees from previous bylaw could make sense, hydro bills makes sense

Lottery system

- takes away from business social entrepreneurship aspect of applications. Applications should have to earn and prove their merit and benefit to the community at large
- has no guarantee of quality of recipients of licences (staff, hours consistency, speed of service)
- unfair to those who have worked for nearly a decade with loyalist township building their brand and bringing thousands of people to the area
- local ownership
