Re: Bath Main Street Reconstruction, Windermere Intersection

Dear Resident,

We are preparing for upgrades to Township infrastructure on your street in the next several years, to be undertaken in three stages. Stage 1 begins in spring 2026 with the intersection at Windermere Boulevard.

The scope of work is to include replacement of watermains and sanitary sewers, water service upgrades, road reconstruction, and a multi-use pathway along the north side of Main Street; and may include drainage improvements.

During this project, there will be occasional water service interruptions to facilitate this work. Residents will be notified well in advance of any shut down.

As our Contractor begins the water main rehabilitation project on Main Street, we wanted to reach out to explain the layout of the temporary water system. The Contractor will install blue plastic temporary water supply piping down both sides of Main Street. Should any of the pipes cross over your driveway, the Contractor will be ramping a granular material so your car can safely cross over top of the pipe.

If you have a low vehicle, you may wish to have it parked closer to the street when work begins to not have to cross this water supply. If you notice that your car is scraping, please alert the Township immediately and we can correct the problem right away to ensure there are no disruptions to the water supply. In some locations, the Contractor may need to embed this pipe into the driveway. This is typically required for steep driveways and where accessibility will be severely hindered during the project, if the pipes were installed above grade.

The Contractor will maintain access to all driveways; however, circumstances may cause temporary disruptions. If this is to occur, the Contractor will contact affected residents individually to plan for any closures and make every attempt to accommodate special circumstances.

All restoration of any grass, curb, asphalt etc., shall be completed at the end of the project. Please be advised that this blue water supply pipe can only be operated by Loyalist Township Utilities Staff. At no point should anyone other than Loyalist Township Staff be handling any valves on this system. All valve handles will be removed to limit accidental operation of the water supply once work begins.

If you have any issues with your water service, please ensure you contact Loyalist Township and we will have it addressed. Utilities staff can be reached at the following numbers:

Utilities Operation Clerk: 613-386-7351 ext. 302#

After-Hours Contact: 613-507-3069

Loyalist Township is committed to ensuring that this project will have the least impact to property owners along the road and a Township representative will always be on site during the work. They will be more than happy to discuss any questions or concerns you have.

Yours truly,

Joe Gratton
Project Supervisor
